Getting safely back to business.

As the nation prepares itself for gradual lockdown exit, the Coronavirus (COVID-19) outbreak will continue to present a risk to people returning to work or attending buildings of any kind across the UK.

- ✓ Specialist internal and external sanitisation service
- ✓ Deep cleaning, pressure cleaning, disinfecting
- ✓ Fogging machines and latest eco-friendly technology
- ✓ Safeguard colleagues, customers and visitors
- ✓ Protect your brand reputation

More than ever, cleaner, safer environments will be needed to reduce this risk and provide added reassurance to colleagues, customers and other visitors. While premises are currently empty or under capacity, now is the ideal time to act and minimise further interruption.

Our dedicated **SafeTOUCH** service sanitises premises on either a reactive or preventative basis. It ensures your brand reputation is well-protected and gets you safely back to business.

Our team of directly employed operatives is the **UK's No.1 market leader** and the only truly nationwide window and specialist cleaning provider. With a regional management structure in place and a central service desk in support we are uniquely positioned to rapidly deploy across multiple sites and significantly reduce the risk of infection.

nssgroup.com

SafeTOUCH covers all surfaces and covers the whole country.

We focus on expertly cleaning areas and touch-points which experience high volumes of footfall and interaction, easily transmitting viruses. Our skilled operatives treat smaller internal areas and touch-points with precision and care while using specialist equipment to rapidly sanitise larger internal and external areas.

State-of-the-art equipment

We've modified existing equipment and invested in some of the latest technology on the market including a portable fogging machine, a very effective high-level disinfecting system, capable of rapidly cleaning multiple surfaces – ideal for internal areas.

The NSS fleet of vans are fully equipped with their own on-board power source. Able to clean and sanitise all water washable surfaces we can rapidly cover large external areas with minimal disruption.

No germs. Many benefits.

- Sanitising solution is atomised to create a very fine fog which binds to surfaces
- Solution is chlorine and alcohol free
- **Kills 99.9% of bacteria, spores, viruses and fungi on contact**
- Won't damage rubbers, plastics or metals
- Safe on soft furnishings
- Minimum 18 hours of residual surface protection
- Areas can be re-opened 45 minutes after application (we said rapid!)

Bespoke service

Some things come as standard with NSS such as national coverage and rapid response but SafeTOUCH comes as a bespoke package of specialist services, delivered to your precise requirements.

SafeTOUCH (External)

External spray and leave sanitisation to entrances and exits

SafeTOUCH (Internal)

Internal sanitisation to hard surface touch points and floors using traditional methods

SafeTOUCH+

Internal and external sanitisation using fogging and latest eco-friendly technology

Five reasons why NSS provides an altogether better service

Altogether better

We've brought all our services together, so you only need one contact. No more dealing with multiple contractors, it's just one team, on one site, delivering everything you need.

National coverage

Better coverage means a better service. We have nine sites nationwide, meaning we're on-hand to offer quick response times 24/7, 365 days a year.

Self-delivery

We don't use subcontractors. We don't hire equipment. We self-deliver the job in-house, ensuring a consistent service and a rapid response, every time.

The safest way

The safest way is the only way. Our skilled, highly qualified staff work to the strictest standards, and a culture of safety and transparency is built into everything we do.

Transparency matters

That's why we provide timely and accurate reports throughout the work, giving you the peace of mind of knowing exactly what's been done. And we use these reports to continuously improve efficiency and quality.

Nationwide coverage and high volume of work means **SafeTOUCH** is very competitively priced. Call us on **03459 677477** to discuss the rapid way to a safer environment.
